8. Spring Break Review
1. Which shows lines that are parallel?
   - A
   - B
   - C
   - D

2. Which street is perpendicular to Dolly St.?
   - Cypress St.
   - Lodge St.
   - Homer St.

3. Subject and show work.

4. Answer true or false.
3. How many vertices and edges does the figure below have?

4. How many vertices does a rectangular prism have?

2. Label each one (edge, face, vertex).

Recall: If he paid with a $50.00 bill, how much change will be $22? If he purchased jeans for $15 each and a pair of shoes for $30 each, two pairs of jeans for $15 each and a pair of shoes for $30 each, how much change will be $22?
Whole Number Operations Practice

Find the value of each expression.

1. \[986 + 1545\]
2. \[2847 + 2136\]
3. \[4767 + 1309\]

4. \[8903 - 4621\]
5. \[3928 - 1564\]
6. \[7612 - 5420\]

7. \[\frac{414}{23}\]
8. \[\frac{316}{24}\]
9. \[394 \times 215\]

10. \[75 \times 21\]
11. \[546 \div 78\]
12. \[3780 \div 126\]

Determine which operation the word or phrase represents.

13. sum
14. times
15. The quotient

Determine which operation you would use to solve the problem. YOU DO NOT HAVE TO ANSWER THE QUESTION.

16. The box office sold a total of 1762 tickets. There were 241 balcony tickets sold. How many regular seat tickets were sold?

17. The warehouse has 14 Isles. Each aisle has 36 shelves. How many shelves does the warehouse have?

18. The orange grove produced 892 crates of oranges. Each train car holds 112 crates. What is the minimum number of train cars they will need?

Determine which operation you would use to solve the problem. Solve the problem.

19. Gymnastics lessons cost $30 per week, how much will 18 weeks of gymnastics lessons cost?

20. Two shirts cost $18 and $25. What is the total cost of the shirts?
